

*Typical construction work site*

- Response to Hurricane Maria has shifted from relief to recovery phase.
- All work is essentially repair and rebuild. Priority is roof work, however, there is also considerable siding and finish work as well.
- An experienced foreman will be provided. They request each team have one skilled/experienced construction/rebuild person for every 4 persons on the team.
- A skill sheet is required for each team member, listing: 1. Type of equipment you have used, 2. Construction projects you have worked on, 3. Experience you have had on roofs, windows, plumbing, concrete, and 4. Painting, hand sawing, shoveling, cleaning concrete walls, etc. This information will determine team assignment.
